PILOT PROGRAMS

THE START OF YOUR MACHINE HEALTH SOLUTION PARTNERSHIP.

3 KEY INGREDIENTS

Learn more about how each sets you up for success.

1. Hardware

2. Software

3. Service

Our machine health solutions have been proven with deployments on **63,000+ assets globally,** and our pilot program allows you to see it in action. Available from 50-250 sensors, the pilot program starts streaming data instantly. **It's time to give your machines a voice. They're talking—start listening.**

1. HARDWARE: Your machine health optimization program can only be as good as the data it's built from. KCF provides ruggedized hardware solutions designed to monitor everything from the most basic rotating equipment, to complex intermittent assets. **KCF's hardware solutions include:** Vibrations Sensors, Base Stations, the IoT HUB, and more. For more information on hardware solutions specifics, please reach out to our team.

2. SOFTWARE: SMARTdiagnostics® Premium is the cornerstone of our software platform—designed to address the widest portion of the industrial market's reliability needs. Your pilot will include embedded user specific dashboards, off the shelf automated fault detection tools, and data analysis tools.

With The Premium software package customers receive:

- MachineIQ
- Full Spectrum Analysis Tools
- Desk and Ticket Management
- Asset Mapping (Corporation + Location)
- Indicator Thresholds + Alarming
- Asset Classification Framework
- Power BI Data Connectors
- Hardware Availability Dashboards
- Unlimited Cellular Usage
- REST API Access
- 3-6 Months of Cloud data storage
- KCF Academy Basic Access
- IIoT Device Management Tools
- Cloud Data Infrastructure

3. SERVICES: SENTRYsolutions™ is a team of experts creating customized analysis and machine health solutions for your plant's assets. Our team is made up of engineers, vibration experts, industry specialists, and optimization professionals who have the training and expertise to understand your business objectives, offer industry leading solutions, and support your manufacturing operations. SENTRYsolutions™ will add custom configuration, priority checks, and efficiency improvements for your plant's assets to increase performance and optimization.
